

The Secret Hidden Mysteries of Water

Water Is Everything And Everything Is Water

Why the water is important?

The body loses water through breathing, sweating, and digestion, which is why it's important to rehydrate by drinking fluids and eating foods that contain water. ... Your body uses water in all its cells, organs, and tissues to help regulate its temperature and maintain other bodily functions.

The importance of water. The water in our bodies is essential for life. Without water, we can't survive. ... Water is involved in every bodily function from digestion, circulation and discharge through to the control of body temperature and the excretion of waste products

What is the significance of water?

Water is one of the most important substances on earth. All plants and animals must have water to survive. If there was no water there would be no life on earth. Apart from drinking it to survive, people have many other uses for water.

Why is it important to save water?

The Importance of Saving Water. ... Water is necessary for the sustenance of human life. While the supply seems abundant, water is not a limitless resource, particularly the fresh potable water most necessary to human survival. Without conservation efforts, this vital supply of water may be exhausted

QUALITY OF WATER PASSING THROUGH THE STRUCTURING UNIT

Vin Hydro Natural Structured water is water in which the healthful benefits of minerals and other positive characteristics have been activated and retained.

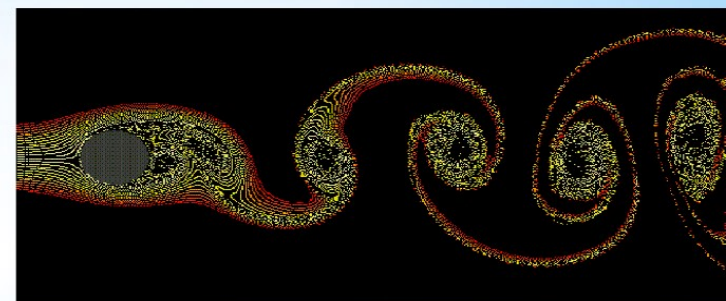

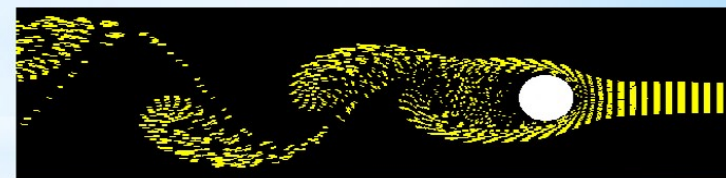

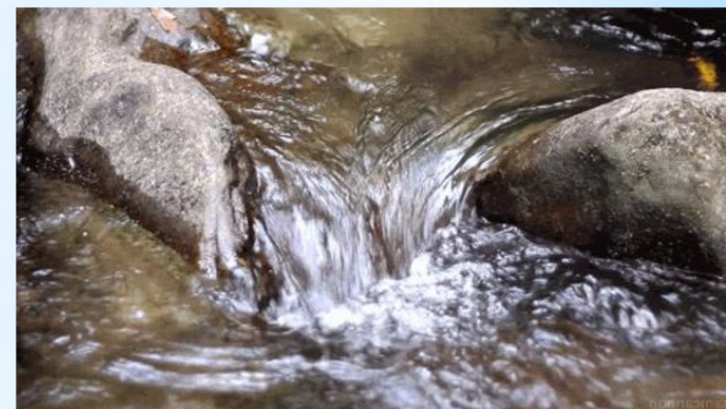

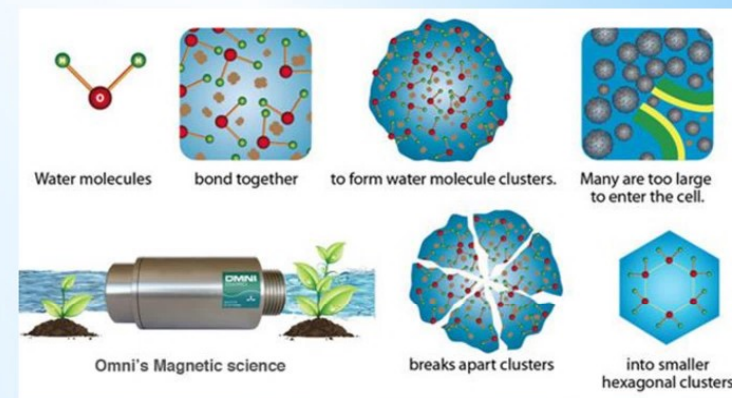

At the same time, excess suspended solids, including contaminants and sediment, are dynamically isolated or removed. This geometric technology breaks up large, low-energy water molecule clusters into smaller, high-energy clusters.

Structuring gives water a lower surface tension and better hydrating properties.

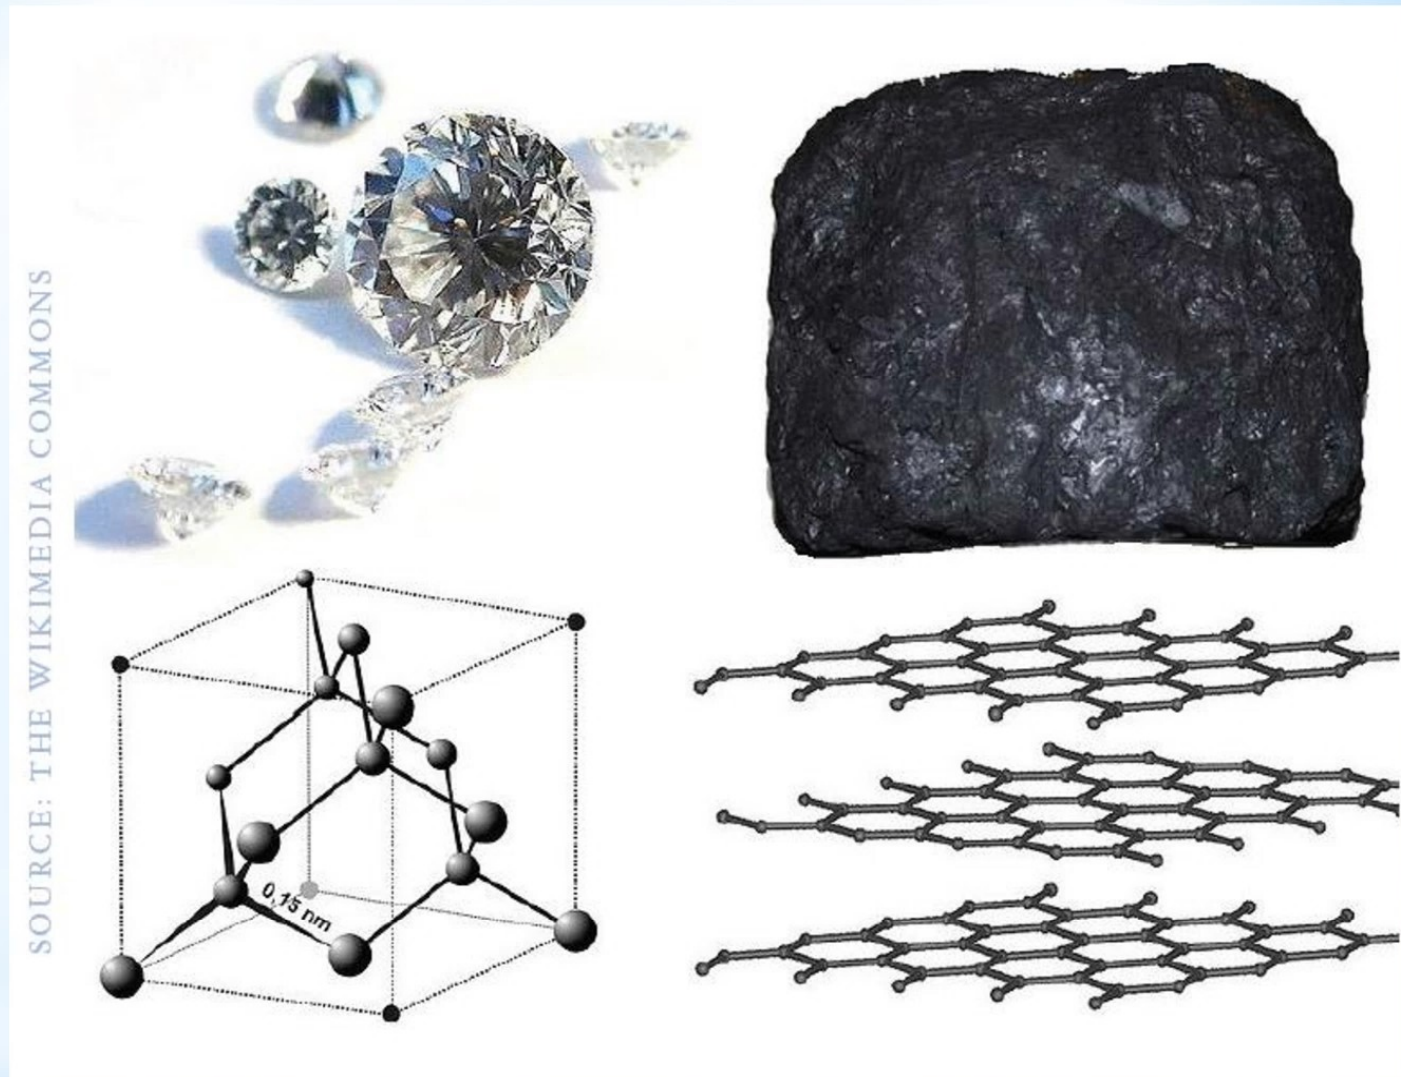

The systematic treatment of water eliminates negative energy patterns and redefines the water's natural, healthy energy pattern

About Technology

Vin Hydro Natural Water Structuring Device restructures water at a molecular level by mean of creating an innovative Vortex Technology, the process after water molecular structure infusing it with higher oxygen content, as well as a higher conductivity coefficient. This transforms result in water yielding more powerful life force.

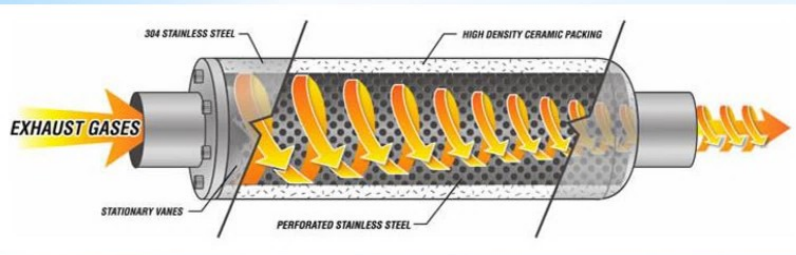

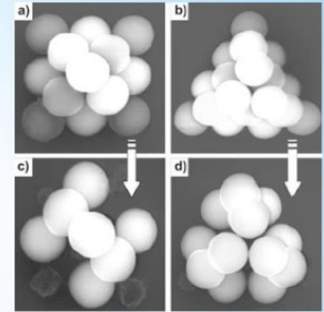

SCIENTIFIC STUDY

These pictures show that the chemical composition of diamonds and coal is carbon, and that the difference in the bonding angles of the carbon gives the two physical substances very different properties. All will agree that diamonds and coal are very different, largely because our eyes can perceive the differences. Unfortunately, the differences between Structured Water and bulk water are beyond the frequencies our eyes can perceive, so we are left with science to demonstrate the differences between waters.

ABOUT PRODUCT PROPERTIES:

1. **Specially developed Healing Crystal spheres** contain rare earth energies In an informational form set into multiple rows in a triangular configuration. This geometric technology breaks up large, low-energy water molecule clusters Into smaller, high-energy clusters. This device gives water a lower surface tension and better hydrating properties.

2. Our Device is surrounded by silicone tubing containing a **charged aqueous mineral solution** which is coiled around the unit and wrapped between a Stainless Steel 316 grades casing on the exterior and a sheet of copper in the interior.

3. **Pure Copper Chamber** in the interior the Device to enhances information transfer directly to the flowing water from the aqueous mineral solution and free of unhealthy chemical and biological contamination as well as negative vibrations or frequencies.

4. **100% Pure Silver Coil** used inside the Device to control bacterial growth. Copper and Silver will allow the concentration of free chlorine to be reduced while still providing comparable sanitary quality of the water.

5. Our Device **used strong neodymium magnets spheres** are used to prevent or reduce scale formation with hard water.

BENEFITS OF VIN HYDRO NATURAL WATER STRUCTURED FOR DOMESTIC USE

❖ Low surface tension, less than 46 dynes per cubic cm	❖ More energy and endurance
❖ Increased blood oxygenation	❖ Wonderful showers and baths – no chlorine smell!, No more dry, itchy skin!
❖ Eliminates mold and algae growth	❖ Reduces chlorine required for swimming pools
❖ Rinses away scale and reduces hard-water deposits	❖ Increases efficiency while reducing wear and tear on water
❖ Reduces costs for water heating	❖ Eliminates need for water softening equipment Softeners and RO systems
❖ Less soap necessary when washing	❖ Removal of existing calcium and aragonite deposits
❖ Reduced corrosion and deposits in pipes	❖ Increased longevity of all systems that use water
❖ Reduces odors around water usage facilities	❖ Improved aerobic bacterial activity in septic and sewage systems
❖ Vin Hydro Natural Water Structuring is loaded with negative hydrogen ions.	❖ Assists in the absorption of healthful vitamins and minerals to all life
❖ Healthier gardens and household plants	❖ Healthier plant growth - green lawns

SEGMENT SOLUTIONS OF VIN HYDRO NATURALS STRUCTURED DEVICES:

Bungalow's, Apartments, Guest House, Hostels and Hospitals

Kitchen

- ❖ For cooking rice and dhal boil very fast and stay long
- ❖ For cleaning of vessels-clean very fast and no stains on the vessels
- ❖ Change in taste and texture of Food / Coffee / Tea

Water Tank

- ❖ Drinking water filter
- ❖ Domestic use – Bathing, Washing

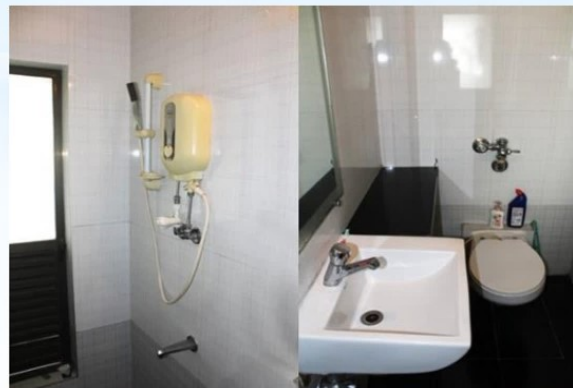

Solar Power

- ❖ No salt forming on Solar heaters
- ❖ Less maintenance of Solar heaters
- ❖ Boil fast and stay long

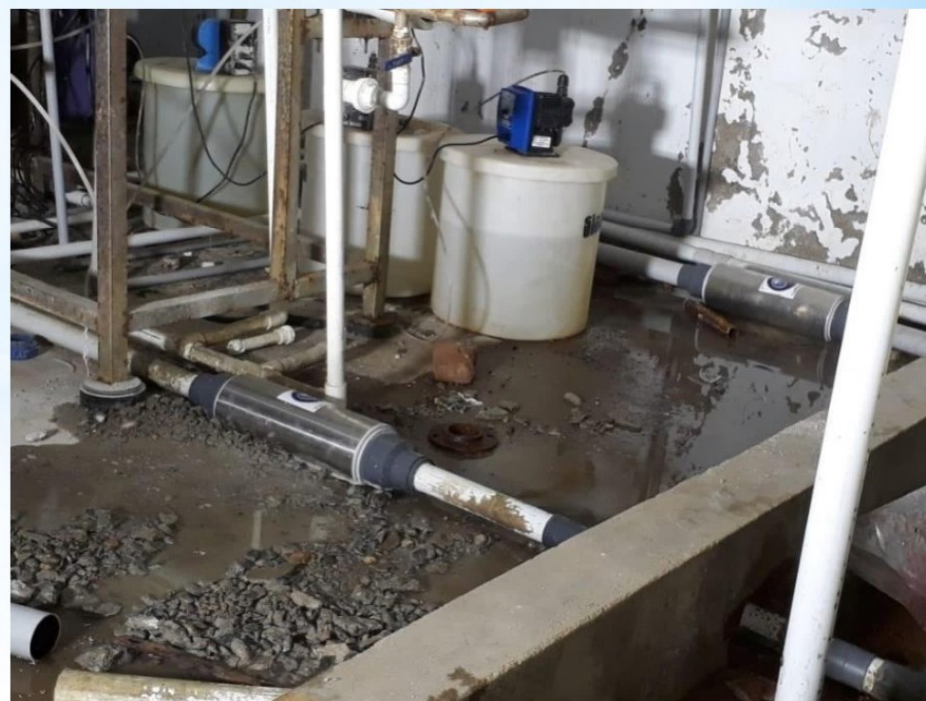

Bath Rooms and Washing

- ❖ No scaling on pipes and fittings
- ❖ No scaling plumbing items and pumps
- ❖ Less detergents for washing machine
- ❖ less maintenance of washing machines
- ❖ Less Soaps and Shampoo
- ❖ Soften the skin and texture of skin

Industrial Application Use – Suitable for up to 3” CPVC Or UPVC or PVC pipe line

INDUSTRIAL APPLICATIONS	INDUSTRIAL BENEFITS
• Chillers, Coolers	• Reduces chemical inputs
• Boilers, Sprayers	• Reduces scale and pitting
• Apartment & Office Buildings	• Reduces or eliminates chemical use
• Cleaning, Washing	• Reduces water usage
• Sewage Treatment	• Reduces labour cleaning costs
• Water Treatment	• Reduces sludge /moulds/slime
	• Eliminates softener systems

Industrial Application Use – Suitable for up to 3" CPVC Or UPVC or PVC pipe line
