

SAKTHI WATER SOLUTIONS

HARD WATER

As you all aware that HARD WATER is water that has high mineral content (in contrast with 'SOFT WATER'). Hard water formed when water percolates through deposits of lime stone and chalk which are largely made-up of calcium and magnesium carbonates. The excess calcium and magnesium can pose critical and grievous problems in **DOMESTIC AND INDUSTRIES**.

PROBLEMS OF HARD WATER IN DOMESTIC

Nowadays the people come across various significance problems facing due to hard water usage such as Hair falls, skin itching, dandruff, and **Other unsolved troubles in DOMESTIC** settings - hard water often indicated by lack of foam formation when soap or detergents are agitated in water, and by formation of lime scale in kettles, water heater, laundry, difficult in cloth washings, scale formation in entire building pipelines, washing machines, Geysers, dishwashers, scaling on the floor, walls, solar heating systems, R.O systems, drip irrigation systems etc.

PROBLEMS OF HARD WATER IN INDUSTRIES

Likewise in INDUSTRIES water hardness is monitored to avoid costly break downs of boilers, cooling towers, industrial R.O systems, Water heating solar systems, dishwashers, power laundry systems, scaling in ETP and STP lines and other relevant water based machineries and equipments that handle water which are scaled due to hard water. Wherever water hardness is a concern, our water structure unit is commonly used reduce hard water's adverse effects and removes existing scale and not allowing formation of scales in plumbing pipe lines, machineries, equipment resulting high labor cost, large

quantity of chemicals, acids usage, unexpected expenses, very often machineries and equipments breakdown, wastage of water , more fuel consumption, time consuming in heating water, cooking food, abnormal taste of food . Our water structure unit gives complete solution for hard water problems. The usage of our water structuring devices results in completely removes the adverse effect of hard water in DOMESTIC and INDUSTRIAL applications.

BENEFITS FROM STRUCTURE WATER DEVICE

Our device is unique in design which does structuring water molecules; it helps to reduce your water hardness problems, and act as natural softener, and also anti scaling.

When water is structured, it creates more energy and helps to remove dead cells from human body. In general water does not have taste, colour and odour but only pH is very important and it plays significant role in human life and their health. But taste is not an issue at all in view of health aspects. Moreover, presence of required JEEVADHARA minerals, memory of useful nature and energy is essential. For which our devices have been performing the best among in all current technologies available, where no chemical used and all are natural process that is vortex-(motion) and structuring water molecules. Any water passes through pipeline of about 300metre it loses its energy and become dead water. To enhance energy of water and rewrite new memory, our water structure units are excellent.

Our water structuring devices ensure the pH stabilization from acidic (it is 6.5 pH and below) to alkaline water (it is above 7 to 8 pH) which will match the pH of Human Blood of 7.43 pH. When your water becomes appropriate useful level of pH and the benefits are helps to recover the following ailments such as Allergy, Arthritis, Asthma, Back pain, diabetic, bone health, weight loss, cancer treatment, ulcer treatment, pregnancy diet, fibromyalgia, skin diseases,, constipation, respiratory complaints, eyes burning etc. it has been studied and proved by WORLD HEALTH ORGANIZATION(WHO).

For the above issues the public spending huge amount (more than 2 lakhs) for buying alkaline water which will have right pH for consumption. With nominal cost for entire home needs and affordable price we have introduced suitable water structure devices in the market through our authorized stockiest/dealers/agents across INDIA.

In this backdrop, we are keen to invite your attention to make use of such wonderful devices and technologies and be a part of this water resolution movement to overcome the water shortage. We also request you all to help us to provide an opportunity to work based upon your needs with 100% satisfaction.

OUR SERVICES

Currently we are positioned as the Industry Leader in proving solutions to the world's water problems by achieving bio-mimicry principles of nature without the use of chemicals, salts or filters. We have carried out numerous live DEMOS and applications pertaining to hard water problems and solved. Till now we have 1000 plus customers in SOUTH INDIA.

Our structure water device usage for treating water at your home or Industries will solve all above mentioned problems of domestic and Industries.

Eagerly expecting your comments and response with valuable orders in this regard.

Feel free to contact us anytime in respect of structured water and its technologies.

For sales and marketing, and about device requirements contact V.Saravanan to this mobile: 8807033739 .

Thanks and Regards
